OMEGA Immobilien Group

Integrated property and investment managers

OMEGA Immobilien Group is an experienced provider of high-quality services in the property management sector, with offices across Germany. We are an independent owner-operated company specialized in managing technically and commercially complex properties from the business, retail and residential real estate sectors. We currently broker real estate assets valued at around 3.5 billion euros in Germany.

With its integrated property management approach, OMEGA Immobilien Group covers the complete lifecycle of the real estate business. Our property and facility management divisions offer a range of benefits for both institutions and private clients, coupled with supplementary specialized services, from transaction management, center management and quarter management to owner community administration and all aspects of operative asset management.

As an integrated property manager, OMEGA Immobilien Group is expanding its scope of business to include the management and distribution of real estate fund vehicles. To this end, OMEGA has

established a new asset management company (KVG), registered under OMEGA Immobilien Kapitalverwaltungs AG. Having its own KVG to take care of investment management projects is a logical step forward for OMEGA Immobilien Group's business strategy.

Orientation to sustained value growth

The holistic consulting and service approach of the real estate experts at OMEGA enables the systematic management of properties entrusted to our care – sustainably and down the line.

OMEGA Immobilien Group was founded in 2000. The owner-operated company currently has around 130 staff members at 16 locations across Germany. Our head office is located in Cologne.
